## **DETAILED ACTION**

## Election/Restrictions

Applicant's election without traverse of claims 8-15 in the reply filed on 01 September 2006 is acknowledged.

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Buhse.

There is disclosed in Buhse an ice-cream cone (food product) formed as a half-shell having a mouth delimited by an annular surface and a side wall, in which the mouth annular surface and the side wall surface have a smooth surface finish, and the outer surface on the side wall has a porous, continuous region 7 which extends peripherally and is receded relative to the mouth annular surface of the half-shell.

Claims 10-13 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Aasted.

There is disclosed in Aasted a food product comprising two wafer half-shells 10, 10; 12', 13'; 12", 13"; 12"', 13"' coupled one to the other along annular mating surfaces defining their mouth profile, wherein the annular mating surfaces of each of the half-shells have centering means complementary one to the other.

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 8, 9 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aasted in view of Buhse.

Buhse, as discussed above discloses a porous, continuous region extending peripherally and which is receded relative to an annular surface of a half-shell.

It would have been obvious to one skilled in the art to form the food product of Aasted with a peripherally extending member as taught in Buhse, in order to limit contact of portions of the food product when stacked upon each other.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Jetschmann, Fekete et al. and Balton are cited for their disclosure of the state of the art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Reginald L. Alexander whose telephone number is 571-272-1395. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
